

## Contract Verbs: Rules and Examples

- ✓ Contraction occurs *only in the first principal part*, i.e., the present and the imperfect stems. The endings of the first principal part are of ε type (ε, ει, η, η) and ο type (ο, ου, ω).
- ✓ The stem endings are ο, α, ε. An “ο” type vowel is the strongest in character, which never lose its phonetic value in contraction; then an “α” type; then an “ε” type.

### A. Contraction with long vowels => gets long

1. α, ε, ο + ω => ω (Note that an “ο” type vowel persists after contraction.) α, ε, ο + ου => ω, ου, ου
2. α, ε, ο + η => α, η, ω  
α, ε, ο + η => α, η, ω/οι

(Note that “ο” and “α” type vowels persist after contraction with an “ε” type vowel.)

### B. Contraction between short vowels

1. Present stem ending in α

α + ε => α    α + ο => ω  
α + ει => α    α + οι, ου => ω/ω

2. Present stem ending in ε ε + ε => ει    ε + ο => ου  
ε + any = any

3. Present stem ending in ο

ο + ε, ο, ου => ου  
ο + diphthongs => οι

### C. For the declension of πάς, see it with Aorist active participles
